

GIS Internship Opportunities

NYS Department of Environmental Conservation
Suffolk County, New York

NYS Department of Environmental Conservation has two GIS internship opportunities for Spring 2019 in their Suffolk County offices.

Region 1, Stony Brook, NY: **Well Mapping and Database Intern in the Division of Water** (ID: 107184)
Looking for a focused, motivated, independent, technical-oriented self-starter interested in water supply management. The intern will assist staff in mapping of historical water wells and work within an existing MS Access database to create a comprehensive water well network map and data bank.

Marine Resources HQ, East Setauket, NY: **GIS/Data Specialist in the Division of Marine Resources** (ID: 107189)
Assist in the collection, management and maintenance of the Division of Marine Resources geospatial data. The position will have the opportunity to work with data from various programs. The intern would also assist in the development of guidance documents to help staff use best practices when collecting and analyzing their data and to assist with special projects as necessary.
