

Entry level geospatial data analyst to bolster resume and gain experience in the geospatial world. Can work remotely and this can turn into a part time or full time paid position after 6 months. Work with a bonafide geospatial company located right in the Hudson Valley known as Luxmatch.

**Land Defined Technologies
Kingston, New York**

Come be a part of PropTech history, using your wide variety of Geographic Information Systems applications and skills as well as all other technologically proficient niches discussed below. Luxmatch, a New York State based geospatial technology Corporation, is currently looking for interns who would like to learn about geospatial data analysis in the business world. Anyone may apply who needs an internship to help their resume and learn about geospatial analysis. Remote working is fine. This is an entry-level position and you can start right away anywhere for 10-20 hours per week. You will be working on a project that will help change the face of real estate brokerage and real estate search through geospatial analysis! We have recently launched www.LuxMatch.com and www.offmarketconsult.com, a NYS licenses brokerage that will work in tandem to help connect more buyers and sellers. We are currently looking for those beginning in their geospatial careers and we would be happy to write you a letter of recommendation if you are diligent in your work.

We are looking for highly driven candidates that are interested in working for us part and full time after the 3-6 month internship working 10-20 hours per week. This may turn into long term career with Land Defined Technologies Corp. You can reach our CEO, Evan Spero at Evan@luxmatch.com by sending your resume and a brief description in the body of the email of why you think you can be a quality candidate for our growing company. Thank you and our team looks forward to hearing from you!
