

## **Creative Geospatial Developer To Fit Into Upstate Proptech Real Estate Brokerage Team**

### **Full/Part Time Geospatial Developer**

Come be a part of "PropTech," history, using your wide variety of Geographic Information Systems application and development skills to help build the future of real estate search. Off-Market Consultants, an upstate NY real estate brokerage, located in the Hudson Valley, and LuxMatch.com, is currently looking for both residents of Upstate NY/NYC Metro area to work on a project that will help change the face of real estate search and lead generation! We will consider looking at remote positions as well.

We are currently looking for applicants that offer some or all of the following skill sets:

Experience working with ArcGIS Pro/ other ArcGIS environments, PostGIS, writing python scripts, as well as using open source tools such as QGIS/Leaflet, new emerging platforms. Setting up and maintaining Geoservers, Mapserver, Postgres with PostGIS, configuring KML and WMS, interfacing with Map APIs. We use both open and ArcGIS services. If you are interested in building Spatial Decision Support Systems, have experience developing highly desirable visual mapping interfaces and toolsets, such as building geovisualization platforms and geoportals, is also helpful. Being familiar with MLS and IDX real estate technology, and Development of geospatial apps is also a plus and should also apply.

We are looking for highly driven, innovative candidates that are hungry to help change the future. You can reach our CEO, Evan Spero at [evan@offmarketconsult.com](mailto:evan@offmarketconsult.com), or by cell at 518.929.9000.
